WHO I AM

I am a professional passionate about programming, with exceptional problem-solving skills and a knack for teamwork.

- I have led teams in ERP projects, working on the front-end by developing and integrating interfaces, and on the back-end by building robust APIs and maintaining databases, always prioritizing software quality.
- I developed an integration API in .NET that automated laboratory analyses, streamlining processes and eliminating manual errors.
- I managed a web platform for distance and in-person learning, overseeing content uploads, editing, and maintaining the virtual environment.
- I have extensive experience with physical server infrastructure, cloud computing, SSH, and computer networks.

Always eager for new challenges, I thrive on combining my technical expertise with my passion for innovation and collaboration.

EDUCATION

- Degree in Software Engineering - Faculdade Uniguaçu - Completion date: 12/2024

PROFESSIONAL EXPERIENCE

Cooperativa Agroindustrial Lar

Job: C# .NET Developer

02/2024 - Now:

- I work with a squad focused on integration of several systems such as silos scales, business management SOAP APIs, REST APIs and RabbitMQ.

Tags: ASP.NET, API, REST, SOAP, Messagery, Query, Framework, RabbitMQ

Faculdade Uniguaçu

Job: Web Platform Administrator

05/2023 - 12/2023:

- I participated in a team of professionals where we built interactive post graduation environments and classes.
- I created automation software using Selenium and ASP.NET MVC, using Entity Framework and in-memory database to automate the process of uploading live classes. This automation resulted in an 80% reduction in the process time.
- I learned a lot about network, deployment and hosting..

Tags: ASP.NET, MVC, Deploy, Selenium, Entity Framework, Windows server, Ubuntu server.

Faculdade Uniguaçu

Job: Infrastructure Technical Assistant

03/2023 - 05/2023:

- I assisted with the infrastructure of regional events.
- I assisted with maintenance of the company's private server.
- I installed and maintained surveillance cameras that guaranteed security for the entire institution.
- I helped manage the network for the entire company.

Tags: Computer network, proxmox, deploy, hosting, CCTV, software security.

Programmer's Beyond IT

Job: Full-Stack Trainee

03/2022 - 12/2022:

- I participated in a team of 7 developers, where we built an ERP system together.
- Developed the front-end such as the back-end of a time appointment module and after, I became responsible for the entire HR module.
- On the front-end I used Angular 14, including Tailwind and integrated with the main API.
- On the back-end I developed the API's HR module using .NET Core and SQL Server, using Entity Framework Core..
- The project was hosted on Azure and was continuously tested and integrated.
